Ultra Glide Foot

The Ultra Glide foot is moulded from a special resin allowing easier sewing of fabrics that may otherwise stick to the standard metal foot such as ultra suede, faux leather, vinyl and even plastics. The non-stick coating makes this foot ideal for directional feeding, too.

An Ultra Glide Needle Plate and Foot set is also available for 9mm stitch width machines. The special resin applied to the sewing foot is also applied to the needle plate. With your fabric sandwiched between these two resin surfaces, there is no resistance on the fabric, ensuring that these speciality fabrics glide through your machine with ease.

| Part Number | Compatible Machines |
|-------------|---------------------------------------|
| 202091000 | Top Loading 9mm |
| 202201005 | Top Loading 9mm—Needle Plate and Foot |
| 200329004 | Top Loading 7mm |
| 200141000 | Front Loading 5mm |
